LANGUAGES - C , C++ , Javascript
CORE - DBMS

PROJECTS

1. REPOMIND (AI GitHub SaaS – Smart Repo Insights & Collaboration)
 Visit Link - https://repomind.anujpatel.tech
-Developed an AI powered Github SaaS application using NextJs,tRPC,Prisma and Clerk which allows users to get their repository insights and team collaboration on projects and automated commit tracking using Octokit.
-Integrated Gemini AI with RAG and vector embeddings to deliver context-aware Q&A, meeting summarization, and actionable issue generation from project audio.

2. IDEANODE (Managing & Organising our SecondBrain)
Visit Link - https://ideanode.anujpatel.tech
-Built a full-stack idea management web app using Node.js, Express, MongoDB, React, and TypeScript, enabling users to capture and organize ideas efficiently.
-Designed a secure and modular architecture with JWT-based authentication, reusable components, and a scalable backend API structure.

3. NextStep AI(AI Powered RoadMap Assistant)
Visit Link - https://nextstepai.anujpatel.tech
-Built an AI-powered roadmap builder using React, Node.js, and MongoDB, allowing users to generate and revisit personalized learning or career roadmaps with secure Google OAuth authentication.
-Designed a modern, scalable architecture featuring a responsive card-based UI, AI-driven roadmap generation, and deployment across Vercel (frontend) and Render (backend).
